

Alkal-Life 7000sL™

Water Ionization and Purification — Next Generation Technology

The Alkal-life 7000sL™ is the world's most advanced technology in water ionization & purification.

Now with the most advanced calibration system ever offered, this system assures you that the pH level you select is precise and completely accurate.

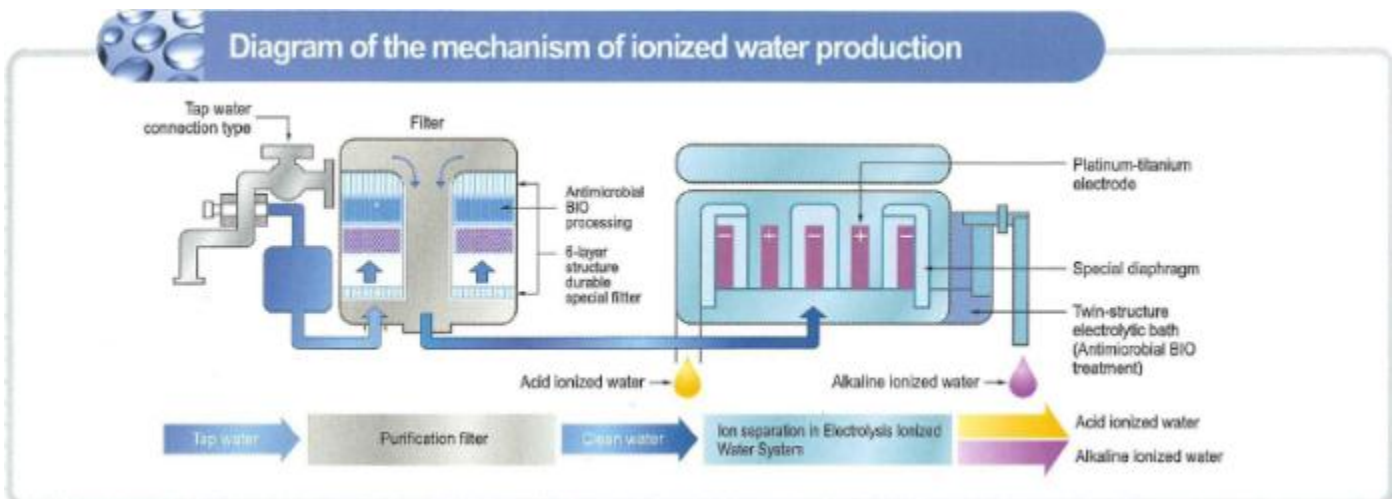

This is the only calibration system that filters all types of water to guarantee you are getting the best water quality available.

The Japanese invented water ionizers in the 1950s. By adding a strong electrical current to ordinary tap water, ionized, alkaline and acidic water are produced. This electrical process is known as electrolysis,

which separates the water into two streams: alkaline mineral water for drinking and acidic mineral water for the skin, cleaning and sanitizing.

The process breaks large clusters of water molecules into "micro-clusters" that are readily absorbed by tissues and cells, leading to better hydration at the cellular level.

How It Works...

With the Alkal-Life 7000sL™ you are investing in your future. This machine is equipped with an advanced pH calibration system which allows regular tap water to effectively channel through the process of ionization. In the diagram above, you will see the process of ionization. Notice that regular tap water from your faucet first enters through a 6-layer purification filter. Next, purified water travels through electrolysis, where precise ionized water is produced. By changing the pH setting, the Alkal-Life 7000sL™ has the ability to perform many functions.

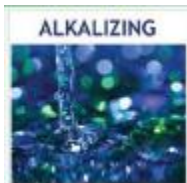

Optimal Health – The Five Ingredients to Optimal Health with Alkal-Life Water

A Powerful Antioxidant

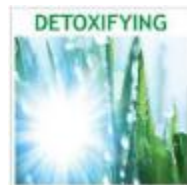

We've all heard the terms "free radicals" and "antioxidants." but do you know what they really mean? Free radicals are unstable oxygen atoms that cause oxidation in our bodies which brings about aging and disease. Oxidation is what turns an apple brown after it is cut or causes metal to rust. The process of oxidation "steals" electrons from the surface being oxidized. Antioxidants work by significantly slowing or preventing oxidation. Drinking ionized alkaline water helps scavenge free radicals in the body. It is nature's greatest antioxidant, laden with negatively charged hydrogen atoms.

Alkalizing Action

Why is alkalinity important? Our bodies function best when they are neither too acid nor too alkaline. Our blood system is always working to keep itself in the narrow pH range of 7.35 to 7.45. Alkaline water can neutralize the acidity of the body caused by stress, modern diet, air pollution and many bottled waters. An acidic body is a breeding ground for disease. Drinking ionized alkaline water greatly enhances the physiological process responsible for attaining and maintaining a relative blood and urine alkalinity. Alkalizing increases the body's natural defenses and strengthens immunity.

Detoxifying and Cleaning

Having a clean colon is important. Animal protein, dairy, alcohol, processed and refined foods, and saturated fats all produce a mucus plaque that adheres to the colon walls. These toxins create a barrier that prevents vital nutrients from being absorbed into the body. It is well known in the field of integrative medicine that a polluted colon contributes to many diseases, but by simply alkalizing our bodies and cleansing our colons, common ailments can be resolved.

Super-Hydration

Ionization breaks clusters of water molecules into smaller micro-clusters, reducing the size of the clusters from the 11-16 molecules in standard water to just 5-6 molecules in ionized water. Smaller clusters pass through cell walls more easily and hydrate the cells more quickly. Ionized alkaline water provides superior hydration and nutrition at a cellular level. Alkal-Life water tastes smooth and sweet, increasing your desire to drink water. You can literally taste the difference!

Bring Your Body Back to Balance

When you take your first refreshing sip of Alkal-Life Water, you will wonder how you ever tolerated anything else! Optimal health begins when Alkal-Life water turns your acidic, polluted, chlorinated tap water into healthy ionized alkaline water.

- Slow down the aging process
- Promote healthy weight loss
- Boost your immune system
- Increase absorption of minerals and vitamins

Alkal-Life Water Benefits – For You and the Environment

Disease Prevention for You and Your Family

The American diet is extremely acidic and acidity in the body is related to disease. The acid environment does not cause disease, but it creates an environment where disease thrives. As the acid condition of the body worsens, it destroys cell walls, corroding veins and arteries and eventually destroying entire organs.

Raising the body's pH by drinking ionized alkaline water gives a boost to the immune system, and a better chance to fight off viruses and bacteria. Eating raw vegetables and fruits, and drinking herbal teas with lemon, along with drinking six to eight glasses of ionized, alkaline water daily is a proven formula for disease prevention.

Decreased Acidity Promotes Weight Loss

The body creates fat cells to trap and neutralize acids in the system. The modern diet of meats, grains, processed foods and beverages such as coffee, tea, soft drinks, and alcohol is extremely acidic. Some acids are voided through urination, defecation, and perspiration, but many remain in the system. Fat cells bind to acids. Some fat cells are voided from the system but many fat cells are stored in the body, resulting in weight gain. Reducing calories will not decrease the acidity of the body - and may increase it if large amounts of acidic beverages are included.

Ionized, alkaline water can reduce the body's acidity and stop fat storage. Micro-clusters of ionized water help flush acid and toxins from the system. A detoxified, non-acidic body has more energy and vitality.

Fountain of Youth - Slow the Aging Process

Aging is the result of damage to bodily tissues by organic acids and by active oxygen (free radicals). Feeling and looking younger occurs when we reduce the accumulated waste products of the body. The outward signs of aging include wrinkles, sagging, and gray hair. Drink ionized alkaline water to wash out acidic waste, add antioxidant power and begin to reverse the aging process.

Say No to Fatigue!

Naturally boost your energy with superior hydration. We all know thirst is a signal that we need more fluid, and for those who ignore that signal, it can lead to loss of appetite, impaired physical performance, increased errand for physical work, nausea and difficulty concentrating. Superior hydration helps boost mental and physical performance. Remember, water is essential to your body and your brain. All body systems function better when you're properly hydrated, and that includes digestion and metabolism.

Reduce Waste and Heal the Planet

According to the United Nations Environment Program, more than 20 billion pounds of plastic ends up in the ocean every year. In addition to the 17 million barrels of oil used in production, bottled water consumes gallons and gallons of water. Let's do our part by saying, "No" to plastic water bottles, and filling our own non-plastic containers with alkaline ionized water.

Guaranteed Low ORP!

The electrolysis process does not only alter tap water into a desired pH (potential hydrogen) level, it also compromises the Oxidation Reduction Potential (ORP). Altering molecules into micro clusters achieves the remarkable production of antioxidants!

In the average foods and beverages we consume, a negative (-) ORP number is a crucial ingredient to good health. High consumptions of acids and products with a positive (+) ORP will not only counter-balance undesirable oxidation to human cells, it can also lead an individual to be vulnerable to disease and age faster.

The Alkal-Life 7000sL™, inspired by leading researchers in Asia, will deliver you pristine water that has a higher absorption rate - a taste you can feel! Test and proven with a low ORP, we challenge you to try the advance Alkal-Life 7000sL™ water ionizer.

What's New

- A touch screen making the system simpler to use
- Self-diagnostic to automatically alert filter changes and other system requirements
- A more refined, advanced calibration system that accurately defines the pH level, creating higher ionization
- A platinum pin, creating smaller water clusters and higher ionization
- FDA certification as a medical device
- A filter that contains silver, eliminating bacteria more effectively, creating pristine ionized water
- 10,000 gallon filter capacity
- Our satisfied customers have compared much higher priced systems that range from \$2,000 to \$4,000 and are confident that have discovered all the benefits of this advanced technology
- The new patented internal design has eliminated pipes and hoses that often require repairs in other ionizers, making this unit one of the most reliable on the market today

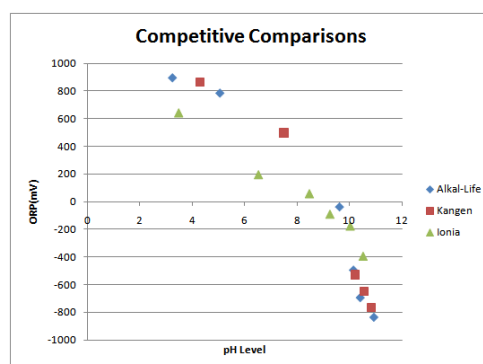

- The hardware and software in the new Alkal-Life 7000sL surpass that of any other water ionizer - regardless of price, exceeding the competition in quality, performance, and reliability
- Best of all, the Alkal-Life 7000sL is affordable and also available through a lease program

Specifications

- Certified as a medical device by the United States FDA
- Rated voltage: 120VAC
- Rated frequency: 50/60Hz
- Rated current: 3 Amps, (5 Amps max.)
- Electrodes: Platinum thick-coated titanium electrode with 5 pins
- Water intake pressure: 0.5-7.0 kg/cm² (7.1 to 99.5 PSI)
- Weight: 3.5kg (7.72lb)
- Dimensions: 271[W] x 367[H] x 138[D]mm (10.67[W] x 14.45[H] x 5.43[D]in)
- Calcium lactate injector: Case injection system (Calcium lactate is a catalyst that enhances electrolysis)
- Water cleaning cartridge service life: sufficient for filtering residual chlorine from 3000 gallons of tap water (actual performance may differ somewhat depending on the water quality, but the cartridge lasts about six months)
- Electrolysis tank cleansing: double auto-change cross-line system
- Protection Circuits: 8-Amp fuse, constant current control circuit, anti-overheating device

Order

www.bio.mats.com

360-944-8692

Option #1: Purchase

- \$1500.00 plus \$40.00 shipping.

Option #2: Lease-To-Own (2 1/2 Year Program)

- \$299.95 down payment;
- \$39.95 for 30 months,
- No shipping fee at start up, no end payment.
- The customer will own their Alkal-Life Water System after payment #30.
- Total Investment to Own: \$1498.45
